

Transportation of Dangerous Goods Ground (Road /Rail)

Program Overview: This program is intended to educate the participant on the principles and procedures of TDG as required by the Transportation of Dangerous Goods Regulations as it pertains to road and rail transport. All Shippers, Receivers and carriers of dangerous goods **must** have this training if they are transporting/receiving products that are considered to be dangerous goods. Such products can be naturally occurring or man-made and can pose immediate dangers such as toxicity, fire, explosion, asphyxiation, or burns, and long-term dangers such as polluting of the environment. Certificates for Road and Rail are valid for 3 years.

Training Content:

- Training Requirements
- Classification of Chemicals (Class 1 thru 9)
- Shipping Names – How to Use Schedule 1,2 and 3
- Means of containment and safety marks
- ERAP (Emergency Response Assistance Plan)
- Accidental release – Reporting Requirements
- Shipping Documents
- Special Situations
- Waste Manifests (if applicable)

Classifications:

- GROUND (Road and/or Rail)

Additional Material:

- Each Participant receives a TDG Pocket Guide Book
- For Workplace Specific Training - to accommodate certain chemicals (additional fees apply)

Course Duration:

- Four (4) Hours dependent upon number of participant
